

Oh here we go again the "MAN" is trying to suppress our freedom of listening to what WE want to listen to when we want to listen to. The success of satellite radio is the result of the "control" of what you hear locally. Local stations all don't appeal to me a never will due to the success of satellite radio. Local stations pretty much all owned by CLEAR CHANNEL play the same playlist every hour and I listen to radio all day at work and Im just sick of this..and the sad part is...CLEAR CHANNEL is nationwide! Millions of people are now enjoying the benefits of satellite radio and many live off of it especially truck drivers nationwide and all the more they use it for traffic, weather, and news.

REJECT NAB PETITION 04-160
